Setting up your Abstract Group VPN

Once you have been invited to access the VPN you will receive an invitation email to guide you through downloading the UniFi Identity Endpoints.

Download the Identity Endpoints and Load Your Credential

- Requires iOS 16, Android 7, macOS 11, Windows 10, or later.
- The credential in your invitation link or email can only be imported into your Identity Endpoint once. If you remove the credential from the Identity Endpoint, a new invitation with an updated credential will be required.
- 1. Do either of the following:
 - Open the *message link* you received and download the UniFi Identity Endpoint for iOS, Android, macOS, or Windows.
 - Open the *invitation email* you received and **Click Here to Install Endpoint** for iOS, Android, macOS, or Windows.

To: amanda@email.com	
Hi	Amanda,
Yo	u have been invited to access UniFi Identity resources on a site: New
Yo	rk Office.
	U
	UniFi Identity Endpoint
	Available on 🗯 iOS Android 🗯 macOS 🎆 Windows
	Requires iOS 16, Android 7, macOS 11, Windows 10, or later.
	Click Here to Install Endpoint
lf y	/ou already have UniFi Identity Endpoint installed, you can load your edential now.
Th de	e credential will expire in 7 days and can be used only on one mobile and one sktop device. If expired, please contact your admin for a new invitation.
U	Visit the UniFi Identity help center for more information.

- 2. Follow the on-screen instructions in your link or email to load your credential.
- 3. Once done, you can start accessing resources with a simple tap.
